Tutorial 8: Creating a Single User Domain with a Wiki.

In Today’s tutorial you’re going to use “Tiddlywiki” to create an interactive text-based adventure game.

Upload today’s tutorial to:

or

whichever is appropriate for you.

Today’s brief

You’re going to use a powerful wiki called “Tiddlywiki” to develop a simple adventure game. We expect you to work on this sufficiently so that there is at least 10-15 minutes worth of interaction to be had by the User.

This system is so cool that the rest of the tutorial will be written using it.
